

IF YOU TEST COVID POSITIVE (STUDENT OR STAFF)

- Positive person quarantines for **5 days starting from the date of the symptom onset.**

>>If you have no symptoms, quarantine is **5 days from your positive test collection date**

(Day (0) is symptom onset day or test collection day if asymptomatic)

*CDC recommends that masks are worn at all times for days 6-10. In the JASD, masks are required during the school day.

EXPOSURE TO POSITIVE CASE *OUTSIDE* HOUSEHOLD:

- Quarantine for **5 days starting from the last day you came into contact with the positive case.** (Date of last exposure is day (0))

* CDC recommends that masks are worn at all times for days 6-10. In the JASD, masks are required during the school day.

EXPOSURE TO POSITIVE CASE *INSIDE* THE HOUSEHOLD:

Not isolated from positive person in house:

- Quarantine the whole time of the positive case's quarantine period (5 days) and for an **additional 5 days after the positive case's quarantine is over.**

Isolated from the positive person in the house:

- Quarantine **5 days starting from the date of your last exposure to the positive case**

(Day (0) is date of last exposure to positive case)

CONTACT TRACING (exposed outside of school)

- Quarantine anyone who was in contact with the positive case up to **2 days prior to their symptom onset day.**

>>If no symptoms, quarantine anyone who was in contact with the positive case up to **2 days prior to the day their test was performed.**

Close Contact- Someone who was within 3-6 feet of an infected person for a cumulative total of 15 minutes or more over a 24-hour period*

- Exception: In the **K-12 indoor classroom** setting, the close contact definition *excludes* **students** who were within **3-6 feet of an infected student** where

- o both students were engaged in **consistent and correct use of well-fitting masks**; *and*
- o **Other K-12 school prevention strategies** (such as physical distancing, and increased ventilation) were in place in the **K-12 school setting**.

Physical Distancing: 3 feet, with layered protections; 6 feet recommended for those who are not vaccinated.

Continue to work with the Department of Health for contact tracing

VACCINATED PEOPLE

>Asymptomatic fully vaccinated people **do not** need to quarantine after exposure to a positive COVID case if they meet the following criteria:

1. They are fully vaccinated, which means 2 weeks following the receipt of the second dose in a 2-dose series, or 2 weeks following receipt of a single dose vaccine.

(Vaccination day is day 0 when determining if an individual is fully vaccinated)

2. They remain asymptomatic since the COVID exposure.

*If you do not meet the above criteria, you must follow recommended quarantine guidelines. *

PREVIOUSLY POSITIVE COVID PEOPLE

>People who have tested positive for *COVID within the past 3 months (90 days)* and recovered **do not** need to quarantine or get tested again if they do not develop new symptoms.

*If they do develop symptoms, they should isolate and seek testing. *

SPORTS

- Students exposed to a positive case during sports are not required to quarantine. Parents/guardians will be notified if their child was exposed. It is recommended to monitor for symptoms.
